Meble zawierają elementy drewniane, których barwa i układ słojów są uzależnione od wielu czynników, dlatego mogą występować różnice w fakturze i barwie co nie stanowi wady produktu i nie wpływa na jego jakość, trwałość i funkcjonalność.

Listwy drewniane mogą ujawniać niewielkie zmiany w kształcie i wymiarach wywołane specyficznymi warunkami eksploatacji takimi jak: wilgotność, różnice temperatur, etc.
